

# IDENTIFICATION

## ULTRAPROBE 9,000

# 9,000 IDENTIFICATION

Items included with the Ultraprobe 9,000

NOTE: UE DMS software available for download at [www.uesystems.com](http://www.uesystems.com)

1. UltraProbe 9,000
2. Scanning Module (SCM)
3. Stethoscope Module (STM)
4. Rubber Focusing Probe
5. Extension Kit
6. Headphones
7. Warble Tone Generator (WTG)
8. Recharger

**SAFETY: WRIST STRAP WORN ALL TIMES**

# 9,000 IDENTIFICATION

## Ultraprobe 9,000 Identification

1. Module Port
2. Wrist Strap
3. Instrument Trigger
4. Battery Pack
5. Sensitivity Dial

**SAFETY: WRIST STRAP WORN ALL TIMES**

# 9,000 IDENTIFICATION

Ultraprobe 9,000 Identification

1. Instrument Display

2. Store/Save Button

3. Headphone Jack

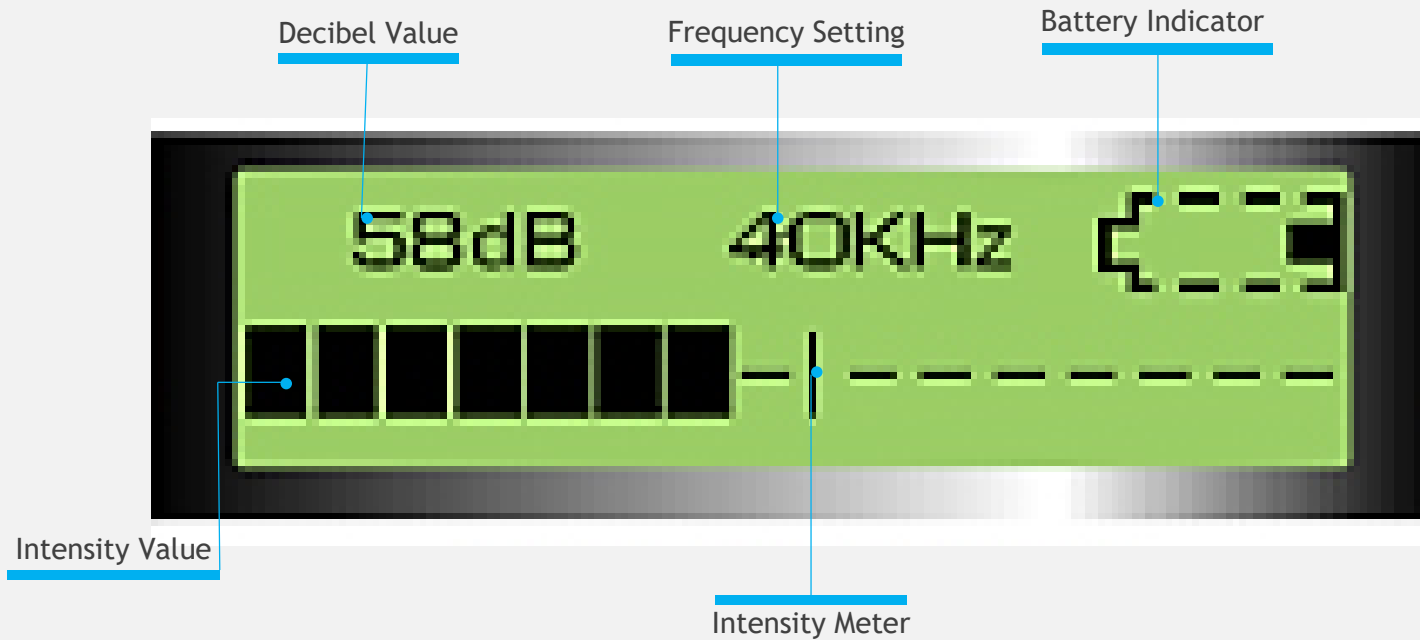

4. Sensitivity Dial

**SAFETY: WRIST STRAP WORN ALL TIMES**

# 9,000 IDENTIFICATION

Ultraprobe 9,000 Screen.

**SAFETY: WRIST STRAP WORN ALL TIMES**

## 9,000 IDENTIFICATION

The Long Range Module (LRM) is an auxiliary module designed to double the distance of the Scanning Module. (Not Included)

Ideally suited to use the LRM for Leak Detection and Electrical Inspections at safe distances with a ten degree field of reception at 40 kHz.

The Remote Magnetic Transducer (RMT) is an auxiliary module ideal for bearing inspections and historical trends. (Not Included)

Used to detect structure borne ultrasound. The magnetic connection overcomes difficult or challenging test points without conflicting with consistent data collection.

**SAFETY: WRIST STRAP WORN ALL TIMES**
